

Meet the Eclipse Foundation

Enabling Industry Collaboration and Open Innovation

Gaël Blondelle - VP Ecosystem Development

October 2020

"Eclipse will very likely be a quick & cost-effective way of forging alliances in the all-important battle for developers ... using open standards & open source software as the means to gather those developer resources."

boston.com ➤ BREAKING NEWS

The Boston Globe Online

The name of this new open source initiative is Eclipse, as in overshadowing of Microsoft's proprietary approach...it may take a long time, but the open-source movement eventually will accomplish what the government failed to do.

Suddenly IBM is cool

The New York Times ON THE WEB

"Eclipse is a break from the proprietary pattern, it come at a critical time in the industry...its a very aggressive move"

2

I have used NetBeans somewhat, and for an IDE written in Swing, it's not bad. The features that Eclipse offers such for refactoring, incremental compilation, debugging, etc. are really hard to beat.

John Swainson

Former head of application development technologies at IBM

An Open Letter to Eclipse Membership

Friday, January 30, 2004

Sun would like to congratulate the Eclipse organization on the eve of the transition to independence. This move proves again that the Java[tm] technology ecosystem is capable of spawning new value and continued technical diversity.

2015

- > EU Research Program activities ramp up

The Eclipse Foundation becomes a European-based organisation

The Eclipse Foundation is furthering its global expansion by establishing itself as a European-based organization based in Brussels.

Our goal is to grow the Eclipse global ecosystem and advance strategic open source projects with international impact.

Strategic Focus Areas - What We Do

Cloud Native Java

We provide a collaborative environment for the world's leading Java ecosystem players to advance open source enterprise Java technologies for the cloud.

IoT & Edge

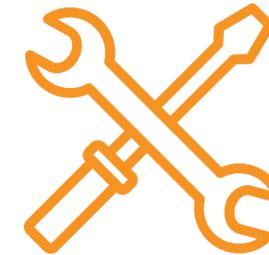

We enable industry leaders to collaborate on an end-to-end IoT architecture that is secure, flexible, and fully based on open source and open standards.

Automotive

We provide leading automotive OEMs, their suppliers, and partners with a sustainable, transparent, and vendor-neutral platform to collaborate on open technologies and standards.

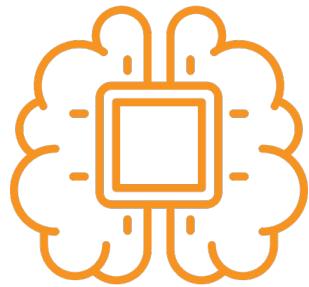

Tools

The Eclipse IDE is the critical development environment for more than 6 million active users. Our community is innovating on the next generation of cloud native developer tools.

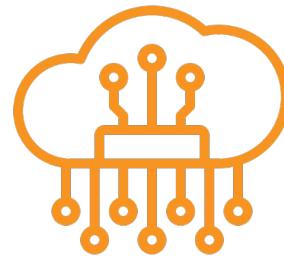

Prospective new strategic areas with our move to Europe

Artificial Intelligence

Support open collaboration on commercial-grade platforms for Artificial Intelligence, Machine Learning, and Deep Learning.

Open Cloud

Foster cross-industry collaboration on an open source platform for a global, multi-cloud infrastructure and services ecosystem.

OpenHW Group

Enable the co-development of open-source cores, related IP, tools and software based on RISC V ISA

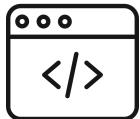

Eclipse Foundation Core Services

Governance & Processes

Ecosystem Development & Marketing

IP Management & Licensing

Projects governance principles

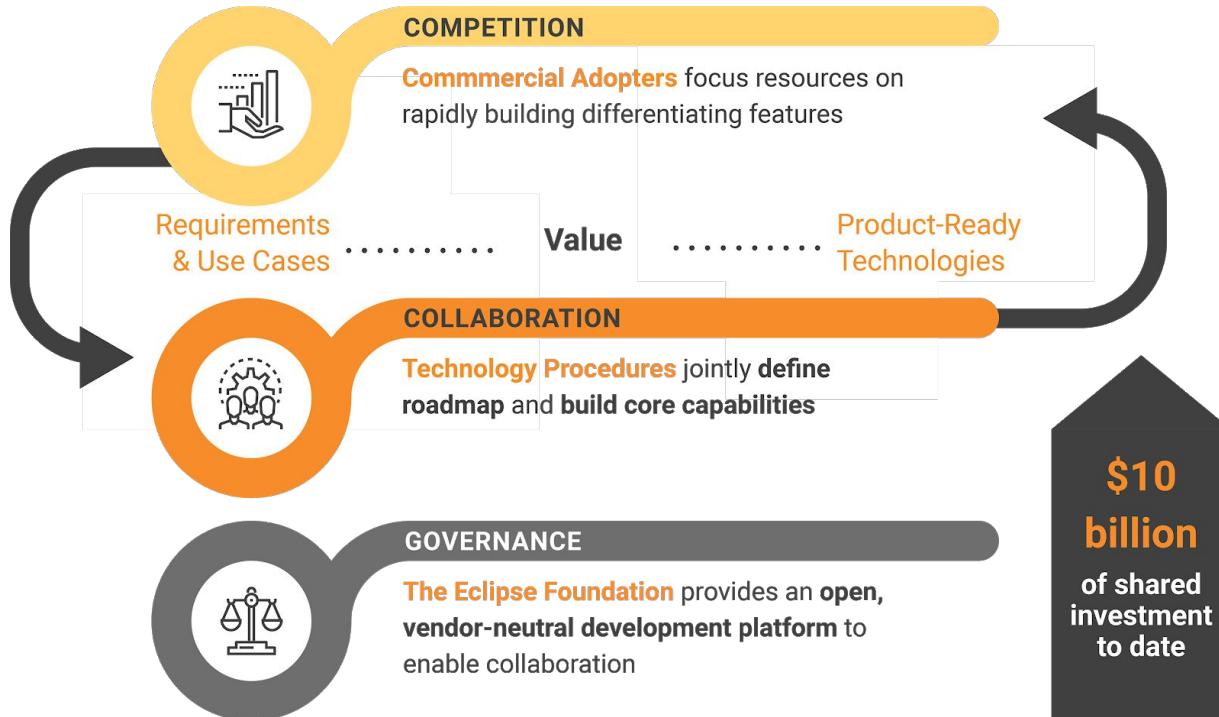

Transparency

Openness

Meritocracy

Our Impact: Open Innovation at Industrial Scale

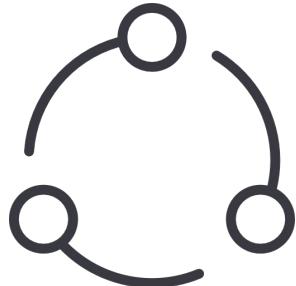

Key Functions of Working Groups

- > Extend the best practices of the Eclipse Development Process
- > Requirements gathering across open source projects and organizations
- > Creating and committing to long term multi-project roadmaps
- > Testing and certification of industry platforms
- > Funding of joint development
- > Support the shared development of open specifications, marketing strategy, security policies, etc.

Working Groups at a Glance

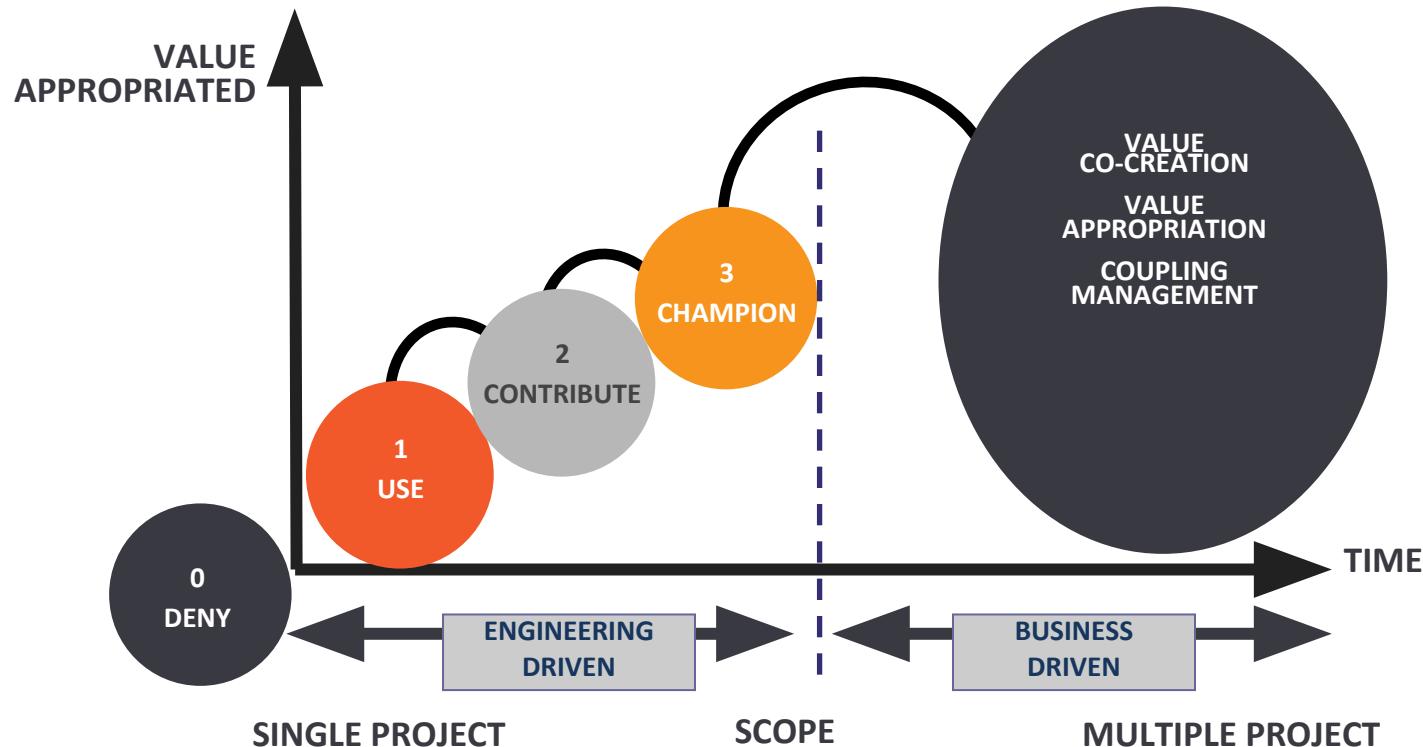

Open Source Foundations enable sustainable, vendor-neutral, open collaboration

Our Unique Approach

| | GitHub | Single-Vendor Open Source | Eclipse Foundation |
|--|--------|------------------------------|-----------------------|
| Thriving developer community | ✓ | ✓ | ✓ |
| High quality code that solves complex problems | ✓ | ✓ | ✓ |
| Ecosystem development and marketing services to drive adoption and monetization | | ✓ | ✓ |
| Predictable processes and guidance to deliver large-scale innovation on a regular cadence | | | ✓ |
| Vendor-neutral governance model to support industry-wide collaboration | | | ✓ |
| Business-friendly IP and licensing services to enable commercialization | | | ✓ |

Let's make open source strategic!

Thank you!
