

Conference Agenda

Monday, June 01

- 12:30 – 13:00 Registration
- 13:00 – 13:15 **Conference opening**
Opening remarks, agenda and other relevant infos – Michael Behrisch
- 13:15 – 14:15 **SUMO Tutorial – Jakob Erdmann**
- 14:15 – 15:15 **Ask us Anything**
- 15:15 – 15:30 Coffee Break
- 15:30 – 17:30 **Workshop 1 – Simulating Connected and Automated Mobility [Einstein-Kabinett]**
- PLEXE and other tools - *Michele Segata (University of Trento)*
 - Eclipse ADORé - *Matthias Nichting (DLR)*
 - SUMO Coupling - *Mihai Kocsis (FZI)*
 - Simulating CAMs / CPMs with SUMO & Libtraci - *Daniel Wesemeyer (DLR)*
 - MOSAIC Demo and BeST Scenario - *Karl Schrab*
 - Discussions
- 18:30 – 21:00 **Evening Program – Boat Tour**
We will meet at the conference venue main entrance at 18:15 and walk together (~ 10 min) to the starting point. We'll set off from Ernst-Ruska-Ufer and navigate the Teltowkanal, Dahme, and Müggelspree, arriving at the Müggelsee - Berlin's largest lake. After spending some time on the lake, the journey will then loop back to our original [starting point](#). Complimentary finger food will be provided. **Please note that drinks must be paid for individually, and only cash payments are accepted.**

Tuesday, June 02

- 09:00 – 09:15 **Opening Address**
Sascha Knake-Langhorst (Head of Department at DLR-TS) and Michael Behrisch
- 09:15 – 10:45 **Session 1 – Moderation: Ronald Nippold**
- sumoITScontrol
Kevin Riehl (ETH Zurich)
- VRU-Aware GLOSA: Integrating VRUs into Green Light Optimized Speed Advisory for Right-Turn Conflicts at Signalized Intersections
Pushkar Mahajan (Technische Hochschule Ingolstadt)
- Radar-Based Evaluation of Car-Following Behavior and Fuel Consumption Across Vehicle Categories in SUMO
Mahdi Al Abdraboh (University of Alabama)
- 10:45 – 11:00 Coffee Break
- 11:00 – 12:00 **Poster Session 1 [Einstein-Kabinett / Newton-Kabinett]**
- Modelling approach for cargo bikes in rural areas as logistic carriers
 - Smart Urban Mobility Simulation: A Case Study of Hradec Králové
 - Integrating Elevation Data in SUMO models for detailed estimation of Energy consumption by Electric Vehicle in large networks
 - Towards Empathic Vehicles: Simulator-Based Induction of Affective States for Emotion Recognition
 - A Multi-Scenario Simulation Approach for Climate-Neutral Urban Corridors
 - Instantania, the fast, parallelized traffic microsimulator for large scale transport digital twins

Conference Agenda

	- Bridging Communities: Advancing JuPedSim for Pedestrian Dynamics and Urban Mobility Research - Sustainable Routing for Next-Generation Mobility: Linking Evolutionary Game Theory and SUMO - Testing Adaptive Lane-Change Planners in Realistic Traffic: A Co-Simulation Framework using SUMO, Simulink, and RoadRunner - Environmental Impact Analysis for a New Urban Development - Network Performance Analysis of Car-Following Models and Traffic Signal Light Configurations using SUMO - Analysis and comparison of Multimodal Link Transmission Model and SUMO in urban networks - KISLEK - KI zur Steuerung verbundener Verkehrsknoten - Revisiting Mesoscopic Traffic Flow Simulation in SUMO: Limitations, Analysis, and an Alternative - QI-TraSiCo – Quantum-Inspired Traffic Signal Control	
12:00 – 13:00	Lunch	
13:00 – 14:00	Keynote: Traffic simulation modeling: combining generative modeling with transportation science to achieve scalability <i>Prof. Dr. Carolina Osorio (Google Research and HEC Montréal)</i>	
14:00 – 14:30	Coffee Break	
14:30 – 15:30	Session 2 – Moderation: Ronald Nippold [Bunsen-Saal] Enabling Non-Lane-Based Cycling Behavior for Mass Bicycle Traffic Flow Simulation in SUMO <i>Ying-Chuan Ni (ETH Zurich)</i> A Cycle-Level Distribution-Based Calibration of Microscopic Intersection Models Using UAV Trajectories <i>Charalambos Tsioutis (University of Cyprus)</i>	Workshop 3 – Digital Twins and Traffic Management in Cities [Newton-Kabinett] Block 1: Public Entities - City of Bratislava - City of Ulm - Tracasa Instrumental - BVG - Berliner Wasserbetriebe - Uni Mannheim
15:30 – 15:45	Coffee Break	
15:45 – 17:30	Session 3 – Moderation: Peter Wagner [Bunsen-Saal] Improving SUMO for Motorcycles <i>Gnanambica Chouta (Technische Hochschule Ingolstadt)</i> Framework for Generating Activity-Based Travel Demand Using Aggregated Mobility and Land-Use Big Data <i>Joerg Schweizer (University of Bologna)</i> A Dynamic Traffic Calibration Framework for SUMO Based on Historical Real-World Speed Data <i>Emanuel Reichsöllner (University of Applied Sciences, Esslingen)</i>	(cont.) Workshop 3 – Digital Twins and Traffic Management in Cities [Newton-Kabinett] Block 2: Solution Providers & Research - Eclipse Foundation - Forschungsinstitut für Kraftfahrwesen und Fahrzeugmotoren Stuttgart (FKFS) - atSTAKE - Bearing Point + Robert Alms (DLR) - Schlothauer & Wauer - Transcality - Kentyou Discussions
18:00 – 20:00	Evening Program – Barbecue and live music by Prof. Dr. Dr. Brinkmann	

Conference Agenda

Wednesday, June 03

09:00 – 10:30	Session 4 – Moderation: Michael Behrisch Integrating Synthetic Populations and Activity Chains for Individual Emission Assessment in SUMO <i>Alix NGARI LENDOYE (EIGSI La Rochelle and La Rochelle University) and Corwin Fèvre (EIGSI La Rochelle)</i> Reconstruction of Public Transport Routes Based on Imperfect GTFS and OpenStreetMap Data <i>Alexander Kaiser (Otto von Guericke University Magdeburg)</i> Energy- and Emission-Conscious Extension of TAPAS-SUMO Coupling - A Case Study in Delmenhorst <i>Yun-Pang Flötteröd (DLR)</i>
10:30 – 10:45	Coffee Break
10:45 – 12:15	Session 5 – Moderation: Jakob Erdmann C-ITS services for light rail systems <i>Paula von der Heide (Technical University of Braunschweig)</i> GROSS: German Rail Open-Source SUMO Scenario <i>Juri Penell (ETH Zurich) and Damian Dailisan (ETH Zurich)</i> SUMO for Railway Applications <i>Christian Rahmig (DLR)</i>
12:15 – 13:00	Lunch
13:00 – 14:00	Poster Session 2 [Einstein-Kabinett / Newton-Kabinett] - Coupling Vessel Operations and Hinterland Traffic with SUMO and PySeidon - Towards Adaptive Traffic Pattern Clustering Reinforcement Learning in Traffic Signal Control - Integrating Macroscopic and Microscopic Road Traffic Simulations for Impact Assessment of Flood-Related Disruptions - Systematic Integration of Heterogeneous Urban Demand Data into a Microscopic SUMO Simulation - Coordinate-based Lane-Specific Detector Map Matching in SUMO - Realistic and Scalable Floating Car Observer Detection in SUMO Derived from Co-Simulation - BikeZ-ETH: Mass bicycle traffic flow simulation API and cycling trajectory dataset - LLM-Driven Agents for Evacuation Simulation in SUMO - Simulation of Unknown Motion - How much do emissions differ? Testing three calculation methods - Multi-modal safety-optimized traffic management system using incident-informed rerouting and adaptive signal control: a SUMO application - sumo3Dviz - A three dimensional traffic visualisation - Toward an Agentic AI Framework for Integrated MATSim-SUMO Policy Evaluation - SESAM: Mobility Simulations in the Cloud - Causality-Aware Energy Forecasting and Adaptive Task Control in Edge-Assisted Autonomous Vehicular Networks
14:00 – 14:15	Coffee Break
14:15 – 15:15	Keynote: SUMO and I – 25 years later... <i>Prof. Dr. Peter Wagner (German Aerospace Center)</i>
15:15 – 16:15	Special Anniversary Session: Celebrating 25 years of SUMO
16:15 – 16:30	Coffee Break
16:30 – 17:30	(cont.) Special Anniversary Session: Celebrating 25 years of SUMO
17:30 – 18:00	Reflection and Remarks
18:00 – 19:30	Conference Photo + Dinner

Thursday, June 04

09:00 – 10:30	Session 6 – Moderation: Robert Hilbrich [Bunsen-Saal] Energy Optimized Green Light Assist in Varying Traffic Scenarios Using Reinforcement Learning <i>Johan Kolms (Ostfalia University of Applied Science)</i> EfaSim - A Prototype for a SUMO-driven Emergency Vehicle Driving Simulator <i>Rebecca Ahmed (Technische Universität München)</i> Driver Models in SUMO and Elsewhere <i>Peter Wagner (DLR)</i>	Workshop 2 (09:00 – 12:00) Using SUMO for simulating innovative public transportation systems + Using SUMO for Railway simulations + Navigating Complexity: Leveraging SUMO for Traffic Planning at Major Events [Einstein-Kabinett] - Selective overview on existing rail transport simulations - <i>TH Wildau</i> - How to simulate the Berlin S-Bahn-Ring including passenger induced delays - <i>DLR</i> - PodCars as next generation public transport system - <i>4Dialog</i> - SUMO scenarios in Berlin public transport - <i>BVG</i> - RailML and beyond - <i>DLR, railML.org</i> - Discussions
10:30 – 10:45	Coffee Break	
10:45 – 12:15	Session 7 – Moderation: Yun-Pang Flötteröd [Bunsen-Saal] Simulation of DACH-Style Detector-Actuated Traffic Signal Control in SUMO <i>Markus Runhao Zhou (Technische Universität Dresden)</i> ATSUM: An Atlas-SUMO Middleware <i>Rodolfo Vieira Valentim (Atman Systems)</i> Investigating Traffic Effects of Control Transitions in Level 3 Conditional Driving with SUMO <i>Robert Alms (DLR)</i>	
12:15 – 13:00	Lunch	
13:00 – 14:00	Session 8 – Moderation: Robert Hilbrich Reproducing Weekly Crash Patterns Using a Minimalist Driver Error Model <i>Ronald Nippold (DLR)</i> Towards Smarter Intersections Through Digital Twins - The Coupling of SUMO and SCENIMINI <i>Lars Klitzke (DLR)</i>	
14:00 – 14:15	Closing – Moderation: Michael Behrisch
